IHIE Honorary Fellow 2008

Stephen Chandler IEng MICE FIHIE

Few members have given as much service to the Institute as Stephen Chandler, who on his retirement from Council and as Honorary Treasurer, received Honorary Fellowship in recognition of over 34 years service at the centre of IHIE's governing body.

Stephen was a member of the first 'HTTA' Council after its incorporation, was elected Association Chairman in 1978 and then Honorary Treasurer in 1982, proposed by incoming chair, John Harris.

Alongside his Council work, Stephen has been a strong supporter of high entry standards, and another of his distinctions is having conducted HTTA's first independent Professional Review in 1986. Rob Beattie, then with Worcestershire, was the successful candidate.

Stephen has moved around the country over the years, setting up and supporting local Institute branches in his wake. He is now settled as the TMA specialist for the Welsh Assembly government, and with highway responsibilities for west Wales.

Wise counsel has long been Stephen's contribution to the Institute and he will be much missed.
